Tension-Compression Load Cells offer 0.50 Percent Accuracy

[Ecnmag.com - June 02, 2009](#)

The subminiature tension/compression load cells series VLU850 offers small size coupled with standard output of 2 mV/V and an integral temperature and zero balance board. This product by Stellar Technology is suited for ranges of 10 lbf to 1,000 lbf. The VLU850 is temperature compensated from 70° to 170°F, and the temperature effect on zero and span is minimal at 0.01 percent/°F. These load cells have a standard operating temperature range of -40° to 250°F, with an optional operating range from -65° to 400°F offered. The unit also features a static overload capacity of 150 percent, suited for demanding and limited-space applications.

Prototyping and Design

What Do You Think?

Do you own an advanced technology vehicle?

- Yes, I love it!
- Yes, it's ok.
- No, but I'd like to.
- No, they're too pricey.
- No, they're an eyesore.
